

# MAMS

## Crew Management Software

The MAMS cloud based Crew Management module enables shipping companies to manage all aspects of their crewing process including crew CV data, payroll, relief plan, appraisal and training. In simple steps the software generates reports and dashboards to help with key decision making and management.

The software is fully customizable to meet your unique workflow needs and can easily integrate with third party or in-house software. It's easy to deploy and simple to learn. Features include:

- CV evaluation and approval flow
- Crew planning, scheduling and deployment management
- Certificates and training monitoring
- Performance management
- Payroll and accounting
- Auto-alerts to monitor expiries
- Multiple payroll report generation
- Dynamic reports
- Crew bio data-entry and data cleansing services
- Easy API integration with third party or in-house software
- MAMS Crew is fully customizable

Upgrades are included in the subscription. We offer full training, 24x7 support and flexible contract terms.

## Why Choose MAMS

The flexible design enables bespoke customisation and easy integration with third party software, ensuring the software evolves with your business needs. We offer:

- User friendly interface, easy to learn
- Competitive subscription pricing
- Flexible contract terms – including vessel changes
- Low-cost data entry and database building services
- Dedicated deployment team
- 24/7 global support
- Onsite and online training
- Help videos and easy to understand user guides in any language
- Customisation available for all modules
- Latest release: Q3 2025

Mercurysoft fleet management software is used by ship managers and owners globally, across all fleet types including tanker, bulk carrier and offshore. Find out more about how our software can improve your crew management.
