

MAMS

Procurement Management Software

The latest version of our cloud-based procurement software digitizes the entire purchasing cycle, and improves inventory management to reduce operational costs.

The software is fully customizable to meet your workflow needs. It's easy to deploy and simple to learn. Features include:

- Direct RFQ email for selected suppliers
- Quotes comparison and approvals
- Approval based on specified limits
- Purchase orders and invoicing
- Capture delivery details of goods and update inventory
- Materials receipts with delivery order details
- Budget creation and cost monitoring
- API integration with accounting systems and third-party software as required
- Inbuilt tracking and business intelligence tools for key analysis

Upgrades are included in the subscription. We offer full training, 24x7 support and flexible contract terms.

Why Choose MAMS

The flexible design enables bespoke customisation and easy integration with third party software, ensuring the software evolves with your business needs. We offer:

- User friendly interface, easy to learn
- Competitive subscription pricing
- Flexible contract terms – including vessel changes
- Low-cost data entry and database building services
- Dedicated deployment team
- 24/7 global support
- Onsite and online training
- Help videos and easy to understand user guides in any language
- Customisation available for all modules
- Latest release: Q3 2025

Mercurysoft fleet management software is used by ship managers and owners globally, across all fleet types including tanker, bulk carrier and offshore. Find out more about how our software can improve your procurement management.
