Dry Docking Module

Are you struggling to keep dry docking schedules organized across your fleet? Is coordinating between shipyards, suppliers, and internal teams becoming a challenge?

Managing dry docking efficiently is critical to keeping your vessels operational and your costs under control. But with multiple key players, tight deadlines, and complex compliance requirements, even the most experienced fleet managers can face delays, budget overruns, and communication breakdowns.

Our **Dry Docking Module** is designed to simplify the entire process. The software is designed to streamline vessel dry dockings by controlling the process of planning through to execution, all within one single easy to use module; managing the vessel, office, vendors and procedures for all the tasks essential to ensure a successful project, reducing docking time and costs.

The features include:

- Creation, planning, and execution of dry dock projects
- Generation of dry dock specifications for each shipyard
- Submission of competitive bids to multiple shipyards
- Standardization of task descriptions for shipyards in Word and PDF formats
- Inclusion of photos, drawings, test sheets, and other attachments in work orders and printed specifications
- Unified access and visibility to information for execution and budget management
- Access to current and historical dry dock records for the entire fleet, along with all related documents
- Availability of spare parts and supplier library
- Transparent price comparisons between suppliers and shipyards
- Efficient planning, budgeting, and cost control
- Comprehensive reporting on completed work orders and dry dock summary reports
- Integrated with PMS to include the Planned, Unplanned and Defect Job to Dry Dock Projects
- Integrated with Procurement to raise requisition process for Spares and Stores
