

MAMS

Safety Management Software

The MAMS user-friendly interface simplifies the management and recording of key QHSE data such as audits, accidents, near misses, risk assessments, safety meetings, and circulars, supporting compliance with industry regulations

The software is fully customizable to meet your unique workflow needs and can easily integrate with third party or in-house software. It's easy to deploy and simple to learn. Features include:

- Accident/Near Miss Reporting
- Risk Assessment
- Safety Meeting and Masters Management Review
- Audit Planning
- Drill Scheduler and Completion
- Shipboard Training Records
- Observation Tracker
- MAMS QHSE is fully customizable

Upgrades are included in the subscription. We offer full training, 24x7 support and flexible contract terms.

Why Choose MAMS

The flexible design enables bespoke customisation and easy integration with third party software, ensuring the software evolves with your business needs. We offer:

- User friendly interface, easy to learn
- Competitive subscription pricing
- Flexible contract terms – including vessel changes
- Low-cost data entry and database building services
- Dedicated deployment team
- 24/7 global support
- Onsite and online training
- Help videos and easy to understand user guides in any language
- Customisation available for all modules
- Latest release: Q3 2025

Mercurysoft fleet management software is used by ship managers and owners globally, across all fleet types including tanker, bulk carrier and offshore. Find out more about how our software can improve your safety management.
