

MAMS

Rest Hour Software

The MAMS user-friendly interface offers comprehensive and easy-to-use dashboards to monitor rest hours and prevent non-conformities. It simplifies crew rest hour management and reporting, helping you plan, manage and record rest hours in line with regulations set by STCW, OPA 90 and ILO (MLC).

The software is fully customizable to meet your unique workflow needs and can easily integrate with third party or in-house software. It's easy to deploy and simple to learn. Features include:

- Comprehensive analytical tools to monitor breaches
- User friendly screens and pop-up warning messages to avoid incorrect entries
- Enter daily rest hours and record shipboard working arrangements
- Reports available in pdf, excel and html

Upgrades are included in the subscription. We offer full training, 24x7 support and flexible contract terms.

Why Choose MAMS

The flexible design enables bespoke customisation and easy integration with third party software, ensuring the software evolves with your business needs. We offer:

- User friendly interface, easy to learn
- Competitive subscription pricing
- Flexible contract terms – including vessel changes
- Low-cost data entry and database building services
- Dedicated deployment team
- 24/7 global support
- Onsite and online training
- Help videos and easy to understand user guides in any language
- Customisation available for all modules
- Latest release: Q1 2026
